Dear Customer,

Re: IMPACT® ADVANCED RECOVERY - Formulation upgrade

In the spirit of continuous improvement, we are pleased to announce the following enhancement to our product portfolio in 2016.

As a result of customer and patient feedback and in order to better align with the changing healthcare environment, **IMPACT® ADVANCED RECOVERY** is being reformulated to reduce overall volume, carbohydrates and calories. Each serve of **IMPACT® ADVANCED RECOVERY** will continue to provide the same amounts of immunonutrients -arginine, omega-3 fatty acids, and nucleotides - which have been clinically proven to reduce the risk of infection and other complications in surgical and trauma patients.

IMPACT® ADVANCED RECOVERY still contains the 3 active ingredients (arginine, omega-3 fatty acids and dietary nucleotides) in the same quantities per serve, with a reduction in overall volume to improve patient compliance. The reduction in calories and carbohydrates now make Impact® Advanced Recovery more suitable to meet the needs of a broader group of patients.

The updated nutritional information and product details have been provided to you below. There will be no disruption to the supply of this product in the transition to the updated formulation.

Product	Version	Nestlé Product Code	Product Description	Presentation	Units per case	Relevant Dates
	Old	12172638	IMPACT® AR	237ml	15 x 237ml	Run out: Aug 2016
	New	12274992	IMPACT® AR	178ml	15 x 178ml	Available: Sep 2016

Food for special medical purposes specifically formulated for medical conditions where nutritional needs cannot be met through diet modification alone. Must be used under medical supervision.
